-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-6 are objected to because of the following informalities: the terms “can be”, “possible to” as recited in claims are not positively recited. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by White (EP 0 777 298 A2).

White's discloses a distribution device telecommunications system (figs. 1-5), with at least one contact element, the contact element having at least two contact springs(see figs. 7a and 7b), wherein a) the contact element has a modular structure in such a way that the configuration of the contact element can be modified by modifying the modular structure(see figs. 7a and 7b), b) the contact element has basic module, the basic module having the contact springs at 44, c) being possible to connect one or more supplementary modules to the basic module (see figs. 1-9), the combination of the basic module with the supplementary module allowing the configuration of the respective contact element to be modified; wherein the supplementary modules and the basic module can be combined with one another in series connection; wherein the

configuration of the respective contact element is determined by selection of the supplementary module the number of supplementary modules or the sequence of the supplementary modules(see fig. 4: one can be used as input and the other side as output); wherein the basic module has inputs and outputs (see fig. 4) assigned to the contact springs at 44; wherein the supplementary modules have outputs; wherein, for a connection of one or more supplementary modules to the basic module, the inputs of one supplementary module engage in outputs of the basic module or in outputs of another supplementary module, these connections between the inputs and the outputs being configured using a connector technique.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean F. Duverne whose telephone number is (571) 272-2091. The examiner can normally be reached on 9:00-7:30, Monday-Thursday.
